---

Professional Summary

Java developer with hands-on experience in designing and implementing scalable backend systems using **Spring Boot**, **Hibernate**, and **RESTful APIs**. Currently working at **Proeffico Solutions Pvt. Ltd.** on a mutual fund platform, integrating with BSE systems. Strong focus on writing clean, maintainable code, and quick to adopt new technologies like Docker and Redis.

Technical Skills

- **Languages:** Java

- **Frameworks:** Spring Boot, Hibernate, JPA

- **Web/API:** RESTful APIs, JWT Authentication

- **Tools:** Maven, Git, Lombok, Postman

- **Version Control:** Git

- **Architecture:** MVC, Microservices (basics)

Professional Experience

Associate Software Engineer
Proeffico Solutions Pvt. Ltd. — Jan 2025 – Present

- Developed and maintained backend APIs for **Edhanam**, a SIP and lump-sum mutual fund investment platform.

- Integrated with **BSE APIs** for real-time investment and client onboarding.

- Implemented JWT-based authentication for secure transactions.

- Used @Transactional to ensure atomicity and rollback in multi-entity operations.

- Managed the codebase using Git and Maven; reduced boilerplate using Lombok.

- Followed MVC architecture and clean code practices.

Key Project

Edhanam – Mutual Fund Platform
Tech Stack: Java, Spring Boot, Hibernate, JPA, MySQL, BSE API

- Developed secure backend APIs for mutual fund investments.

- Integrated BSE onboarding and investment flow.

- Ensured data consistency using Hibernate transactions.

- Performed R&D to optimize for Redis caching and API performance.

Education

Bachelor of Computer Applications (BCA)
Magadh University, Bihar

Certifications

- Java Programming – SoloLearn

- Java (Basic) - HackerRank
